

Dale A. Miller

Dale Miller is the senior location executive for the GLOBALFOUNDRIES Fab 9 manufacturing site located in Essex Junction, Vermont, with responsibility for government and community relationships. He provides executive leadership for site-based issues safety, security and environmental initiatives. In addition to his site-wide executive leadership, Miller oversees the 200mm semiconductor manufacturing and operations at the company's site. As the senior director for manufacturing operations, he is responsible for delivery execution, capital and capacity planning.

Miller has more than 35 years in the semiconductor industry including leadership positions at both IBM and GLOBALFOUNDRIES in Vermont. He has held technical positions related to manufacturing equipment support for testing of semiconductor hardware as well as a series of management positions in test and semiconductor manufacturing, site production control, worldwide supply chain and as a contract manufacturer client executive.

Miller is an executive board member of the Fab Owners Alliance, a global consortium of semiconductor factories, and a member of the board of directors for the Vermont Chamber of Commerce. In March 2018, he was inducted into the Vermont State Colleges System Hall of Fame.

An active community volunteer, Miller has also been a co-chair for the Fab 9 site annual charitable giving campaign, a mentor in the GF employee mentor program, and serves as the executive sponsor for the Burlington Early Tenure Professionals group. He earned his A.A.S. in electrical engineering technology from Vermont Technical College.
